LISTEN, LOOK, LEARN ... THE LANGUAGE OF INFLUENCE

RISK MANAGEMENT & ASSESSMENT

It is not possible to control or manage 100% of risk, but knowing what to do before, during, and after an event will mitigate the damage and harm. Identifying potential hazards and risks and making it part of the day to day business is important. Safety should be the first priority as every business must face the reality of risks and hazards.

Through our Risk Assessment and Management course, delegates will be made aware of hazards and risks they didn't realize were around their workplace. Identifying hazards through proper procedures will provide your participants the ability to prevent that accident before it occurs. Limiting and removing potential dangers through Risk Assessment will be an incredible investment.

TRAINING PROGRAMME OBJECTIVES

- Identify hazards and risks
- Update control measures
- Grasp the fundamentals of accident reports
- Identify risk management techniques
- Outline a disaster recovery plan
- Communicate to the organization
